

Adapt IT Streamline Mobile Solution

Manages Mobile SIM Usage & Cost

Adapt IT Streamline Mobile is a cloud based software solution. It has been developed as a SaaS (Software as a Service) model that will manage the mobile user environment in any enterprise, with specific focus on visibility of any type of SIM based usage and cost.

This fully hosted and managed solution allows for ease of data and/or invoice API integration across all Mobile service providers which provide in depth visibility and integration into your organisation's internal structures, such as departments, divisions and regions.

The Streamline Mobile technology platform is managed by a team of experts, delivering end-to-end service and advise that focusses on optimising the following:

- Excessive mobile usage and costs
- Business processes
- Increasing efficiencies
- Best practice strategies and
- Cost containment

All of the above will lead to a return on investment for your organisation.

Value Proposition

Streamline Mobile for mobile expense tracking provides you with an in-depth enterprise mobility management solution outlining every aspect of mobile consumption so that you control, optimise and can use to plan ahead.

The platform's seamless integration with mobile carriers provides our clients with transparency and insight into their mobility costs, through an extensive examination of billing and usage of mobile devices.

Streamline Mobile Solution Benefits
