# Perhaps you're looking for something a bit more long-term, maybe consider our cyber security retainer services

**CyberSec** can provide short, medium & long terms retainers to companies looking for ad-hoc or fixed-term expertise.

**CyberSec** retainer services ensure that your business has the right skills, at the right time! This business enabling service demonstrates our commitment to assisting your organisation achieve its cyber security objectives – working alongside the broader business to assist with ANY and ALL cyber security requirements.

As part of the retainer service, we would be in a unique position to not only highlight any potential weaknesses but also to assist the business with its remediation efforts. Most importantly, we would be in a position to actualise risk reduction and facilitate engagements with management, auditors and the technical team.

Through a combination of deep technical expertise, business acumen and clear board-level reporting, **CyberSec** will ensure your business is well equipped to identify, detect, protect, respond and recover from cyber related incidents.

# Governance, Risk & Compliance

ISO, NIST, CIS, PCI-DSS, ISF, CSA

## Need help with your controls?

- **CyberSec** follows a Risk-Based Approach
- Aligned with leading audit frameworks:
  - Test of Design (ToD)
  - Test of Implementation (ToI)
  - Test of Effectiveness (ToE)
- Our Cybersecurity Maturity Assessment (CMA) can help to benchmark your organisation against:
  - Industry / Sector Peers
  - Best Practices
  - Leading Standards

Let **CyberSec** help you translate cybersecurity risk into business risk. We can assist with accurately quantifying the inherent and *residual* cybersecurity related risk whilst encompassing the risk likelihood and impact.

# POPIA

Protection of Personal Information Act 4 of 2013

## Are you ready for POPIA?

- Commencement Date: 1 July 2020
- Effective Date: 1 July 2021

**CyberSec** has assisted many organisations with their POPIA journey by conducting a POPI Readiness Assessment.

- Failure to adhere to these requirements can result in regulatory fines of up to R10 million, and prison terms of up to 10 years.
- Let **CyberSec** assist your organisation with a methodology that is aligned with leading audit frameworks:
  - Test of Design (ToD)
  - Test of Implementation (ToI)
  - Test of Effectiveness (ToE)
